Photos Taken by Tour Participants

This month I am showing photos taken by tour participants that went on the February 2007 safari to Tanzania. You don't have to be a professional photographer to get great pictures on our safaris!

It's always exciting photographing elephants when they approach close enough that we can hear their stomachs rumble!

Kenya with Paul Renner and Jim Zuckerman

I am happy to announce that from September 25 through October 11, 2007 I will be co-leading a photographic safari to Kenya with world famous photographer Jim Zuckerman. Jim asked me if he recruited the photographers, would I lead the trip with him? How could I turn down an offer like that! I am happy to announce that the safari is already sold out and we are looking forward to an incredible trip. It will be an exciting trip because he has recruited photographers from around the world.

Adventure 16 Store Slide Show Presentations

Later this month I will be giving slide presentations about our safaris at three

[Adventure16](#) wilderness outfitting and camping stores in San Diego County, California. Join me at Adventure 16 stores for a great opportunity to see my photographs and hear exciting stories about our African safaris !

Client's Photos

We had a great group of people on our trip to Tanzania last February! Dick Shaughnessey came up with the idea to take 4 or 5 photos per person, that were taken by safari participants and post on my web site. I liked the idea and because it was Dick who came up with the suggestion so we'll put him first on the list.

Just click on their name and it will take you to their photos. I think that after seeing their photos that you will agree that you don't have to be a pro to get great photos on out safaris!

Lodges and camps we use on our Safaris

We stay in first class luxury lodges and camps.

[For information and photos of the lodges and accommodations click here.](#)

Africa is famous for it's spectacular sunrises and sunsets. During the safari we leave the lodges before sunrise and return after sunset. This gives us the best opportunities to photograph this incredible beauty.
